HOW IT WORKS

Users can download the app for free from the Google Play Store or App Store. Once a user opens the app, it will ask for permission to use the mobile location feature. *If a user agrees, the app will load only information that is relevant to the user's current location.* If a user disagrees, the app will load all information on the app regardless of location. Users have the option of registering. Users can also favorite/save posts.

The Society Glo app offers information about Resources, Jobs, and Civics.

Only verified individuals who represent businesses, non-profit organizations, and elected government officials can post on the Society Glo App.

Verified users will receive an email with a password, which will give them access to the admin panel where they can post content.

The Society Glo app is a presentation only app, meaning there are no comments or responses allowed to any post on the app.

THE PROBLEM

People are cynical and skeptical of government and business. Community members don't know anything about their elected officials whether local, regional, or national. We live in a time of misinformation and blatant lies. There is anger and resentment towards government officials as well as government institutions. According to US News only **64%** of eligible Americans voted in the 2024 presidential election. Unfortunately voter turnout gets worse when looking at state and local elections. In the last Los Angeles mayoral election, only **43.86%** of eligible voters participated in that election. **Conspiracies and paranoia are at an all time high because people aren't getting their information from reputable sources.**

People are unaware of government and non-profit resources available to them within their communities. The perception is the government doesn't care about the people, they only care about the corporations and big business. People feel like there is a system that is set up to only help the wealthy and elite. The working class and poor feel like there is a power structure that does not benefit anybody that is not wealthy. This happens because of the anonymity of our elected officials as well as our business leaders. **The Society Glo app will be a platform where these individuals can share their thoughts and their vision for a better Society.**

THE GOAL

Hear from the people who have the ability to help or make changes. **The Society Glo app will only platform leaders in business, non-profits, and government.**

The Society Glo app is **nonpartisan** and will allow all elected officials the opportunity to share their ideas about building a better community. We hope to partner with elected officials, business, and non profit organizations to highlight what is going on in communities around the country.

The goal is to **illuminate the good that is happening in communities** as well as highlighting opportunities to improve.

The Society Glo app will be a platform where these individuals can share their thoughts and their vision for a better Society.

Society **GLO**

HELP OUR SOCIETY *GLO UP!*

Partner with Society Glo and help us reach the people who need access to resources, jobs, and community programs the most.

Admin accounts are free online using a safe and easy-to-use admin panel, and the Society Glo App works on Google Play Store and Apple Store mobile devices!
